Homework #3

Your task is to recreate the webpage on the following page using CSS. When finished, upload your .html file to my website.

You may only use <DIV> tags within your webpage to hold your content. All page formatting **must** be done in CSS. All code must be properly indented.

The B225 computer lab can be very helpful with completing your assignments. If you have any trouble, I encourage you to meet the lab assistants and familiarize yourself with the facility.

Important

You must use notepad++ (PC) or TextWrangler (Mac) to create your file. Both are free to download. You can also try Sublime and Brackets, both cross platform.

Make sure you use the .html extension.

Also…

The page has a background image, just google "CSS Background image" to see how to do this.

Look, I googled it for you...

https://www.google.com/search?ei=bn9UXLILsMfmAszJi9AI&q=CSS+background+image&oq=CSS+background+image&gs_l=psy-ab.3..0l10.9619.12547..12680...0.0..0.65.1084.20.....0....1..gws-wiz.....0i71j0i67j0i131j0i10i67j0i131i67.JRVD7xECxAg

The image of the cat is inserted using an <img> tag.

The background image and the grumpy cat image can be found at...

http://newton.ncc.edu/gansonj/ite154/img/grumpcat.png
http://newton.ncc.edu/gansonj/ite154/img/catbkg.jpg

Remember, the file MUST have the extension .html I will send the file back to you and not give credit for the assignment if it does not have this extension.
