Project #1

Recreate the webpage on the following page exactly as you see it.

Important

- You may use only structural HTML tags (<div>)

- You **may not** use any HTML formatting (<font>, <br>, <p>, or any style formatting within an HTML tag. (ie. <body bgcolor="xxxx">)

- All formatting must be done using CSS as we have been doing in class

- All code must be properly indented (both CSS and HTML)

- Code must have appropriate line brakes

- The pagewrap DIV must use a static width of 700 pixels and use elastic margins. (10 points)

The graphics can be found at…

http://newton.ncc.edu/gansonj/ite154/img/pizza1.png
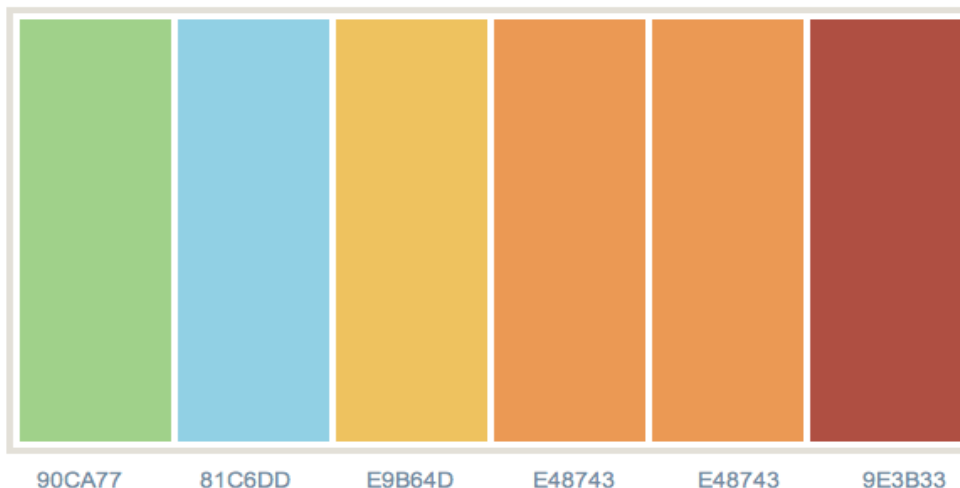

http://newton.ncc.edu/gansonj/ite154/img/pizza3.png

Very important…

Please note that the graphics are **inserted as background images** of the <div> tags. For more information on how to do this, simply google 'CSS background image'. Proper placement of the image will be worth 15 points.

Here is a list of the colors used on the page and their HEX values.

| 90CA77 | 81C6DD | E9B64D | E48743 | E48743 | 9E3B33 |

Remember, the file MUST have the extension .html I will send the file back to you and not give credit for the assignment if it does not have this extension.
Any questions, feel free to email me.
